

Vendor shareable

Live API verified

Orange County

UsaRakhi → Orange County Vendor API

Integration guide with live curl commands and response evidence for every feature.

BASE URL

`https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod`

VERIFIED (UTC)

`2026-08-01T11:48:07Z`

AUTH HEADER

`X-Vendor-API-Key`

SERVICE

`orange-county-vendor-api (dedicated)`

Dedicated Vendor API only. Do not use the website/storefront API host. All examples below were executed against production Vendor API and captured for this document.

1. Credentials

Base URL	<code>https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod</code>
API Key	<code>4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673</code>
Header	<code>X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673</code>

Keep this key private to Orange County fulfillment systems. Rotate with UsaRakhi if exposed publicly outside this partner channel. Every curl below is a full copy-paste command (no export / variables required).

2. Feature map (what you can do)

Feature	Endpoint
Health check	<code>GET /health</code>
Import orders (15 days default)	<code>GET /vendors/orange-county/orders</code>
Pagination (>50 / custom page size)	<code>?limit=1..200&cursor=...</code>
Get one order	<code>GET /vendors/orange-county/orders/{orderNumber uuid}</code>
Post AWB when shipped	<code>POST /vendors/orange-county/shipment (also path style)</code>
Post tracking status	<code>POST /vendors/orange-county/tracking (also path style)</code>

Fulfillment notes: orderValue / item price are vendor cost (not website retail). Match products by sku / productCode. Store orderNumber (e.g. 0C10003) as your external reference. Phone/email in screenshots below are partially masked for this shareable PDF; live API returns full values.

3. End-to-end workflow

1. Poll **list orders** every N minutes (days=15, use updatedSince for incremental sync).
2. Paginate with nextCursor while hasMore=true.
3. Import / pick / pack using recipient address + gift message + SKUs.
4. When courier assigned – **POST shipment** with orderNumber, courierName, awb.
5. When status changes – **POST tracking** with currentShipmentStatus.
6. Skip duplicates by remembering imported orderNumbers.

4. Live evidence – curl + response screenshots

Each panel below is a live capture from production (2026-08-01T11:48:07Z UTC). Green = success path; amber = expected validation / auth error proving the route is live.

A Health check

Confirms the dedicated Vendor API is up.

```
curl -sS \  
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/health"
```

Terminal – Health

HTTP 200

```
$ curl -sS "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/health"  
  
{  
  "ok": true,  
  "service": "orange-county-vendor-api"  
}
```

B Auth required

Missing API key is rejected.

```
curl -sS \  
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders?days=15&limit=1"
```

Terminal – Auth (no key)

HTTP 401

```
$ curl -sS "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders?days=15&limit=1"  
  
{  
  "error": "Valid X-Vendor-API-Key required"  
}
```

C List orders (import feed)

Default window = last **15 days**. Page size default 50, max 200.

```
curl -sS \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders?days=15&limit=50"
```

Terminal – List orders (page 1, compact preview)

HTTP 200

```
$ curl -sS -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders?days=15&limit=2"

{
  "vendorSlug": "orange-county",
  "count": 2,
  "limit": 2,
  "days": 15,
  "hasMore": true,
  "nextCursor": "eyJQSyI6Ik9SREVSIzdkNGU1ZTc0LWU4OWEtNDc3YS1iZDEyLWRhYjYhYj\u2026",
  "orders_preview": [
    {
      "orderNumber": "D26EDAB5",
      "status": "paid",
      "orderValue": 9.75,
      "itemSkus": [
        "TFPRD00313"
      ]
    },
    {
      "orderNumber": "0C10003",
      "status": "paid",
      "orderValue": 28.95,
      "itemSkus": [
        "TFUSRH2026-16"
      ]
    }
  ]
}
```

Full response includes full address, gift message, items[], weights, and image URLs.

D Pagination (more than one page)

Use nextCursor from the previous response. Keep calling while hasMore === true.

```
# Page 1
curl -sS \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders?days=15&limit=1"

# Page 2
curl -sS \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders?days=15&limit=1&cursor=PASTE_NEXT_CURSOR_FROM_PREVIOUS_RESPONSE"
```

Terminal – Page 1 (limit=1)

HTTP 200

```
$ curl -sS -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders?days=15&limit=1"

{
  "vendorSlug": "orange-county",
  "count": 1,
  "limit": 1,
  "days": 15,
  "hasMore": true,
  "orders_preview": [
    {
      "orderNumber": "D26EDAB5",
      "status": "paid",
      "orderValue": 9.75
    }
  ],
  "nextCursor": "eyJQSyI6Ik9SREVSI2QyNmVkYWI1LTU2NjItNDI2Yi1iNDhhLWFlMWUz\u0026"
}
```

Terminal – Page 2 (cursor from page 1)

HTTP 200

```
$ curl -sS -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders?days=15&limit=1&cursor=PASTE_NEXT_CURSOR_FROM_PREVIOUS_RESPONSE"

{
  "count": 1,
  "limit": 1,
  "hasMore": true,
  "nextCursor": "eyJQSyI6Ik9SREVSIzdkNGU1ZTc0LWU0WEtNDc3YS1iZDEyLWVhYjYj\u0026",
  "orders_preview": [
    {
      "orderNumber": "OC10003",
      "status": "paid",
      "orderValue": 28.95
    }
  ]
}
```

Evidence: different orderNumber on page 2 (OC10003) after D26EDAB5 on page 1.

E Get a single order

Accepts human orderNumber (recommended: OC#####) or internalOrderId (UUID).

```
curl -sS \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders/OC10003"
```

Terminal – GET order OC10003 (PII partially masked in PDF)

HTTP 200

```
$ curl -sS -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders/OC10003"

{
  "orderId": "OC10003",
  "orderNumber": "OC10003",
  "internalOrderId": "7d4e5e74-e89a-477a-bd12-dab8ce979cd2",
  "orderDate": "2026-07-26T07:29:12.458Z",
  "createdAt": "2026-07-26T07:29:12.458Z",
  "updatedAt": "2026-07-29T08:10:38.951Z",
  "status": "paid",
  "senderName": "Viara Shori",
  "recipientName": "Mohit Shori",
  "recipientAddressLine1": "44584 state route 20 concrete",
  "recipientAddressLine2": null,
  "city": "Concrete",
  "state": "WA",
  "country": "US",
  "zipCode": "98237",
  "orderValue": 28.95,
  "orderValueCurrency": "USD",
  "deliveryDate": null,
  "giftMessage": "Although we are far away from each other, this distance will not affect the strong bond of our relation. Happy Raksha Bandhan! This package is filled with Rakhi as well as overloaded with our emotions. Please accept this bundle of love and emotions.",
  "trackingNumber": null,
  "carrier": null,
  "recipientPhoneNumber": "+1***4302",
  "recipientEmail": "vi***@yahoo.co.in",
  "items": [
    {
      "sku": "TFUSRH2026-16",
      "productCode": "TFUSRH2026-16",
      "productName": "Set of 2 Traditional Designer Rakhis with Kaju, Pistachios & Besan Laddu Gift Hamper for Brother | Premium Raksha Bandhan Gift Set",
      "price": 28.95,
      "quantity": 1,
      "weight": 32,
      "weightUnit": "oz",
      "productImageUrl": "https://d301af4ndyn9qx.cloudfront.net/uploads/orange-county/TFUSRH2026\u0026\u00262026"
    }
  ]
}
```

```
curl -sS \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders/d26edab5-5662-426b-b48a-ae1e39790e25"
```

Terminal – GET by internal UUID also works

HTTP 200

```
$ curl -sS -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders/d26edab5-5662-426b-b48a-ae1e39790e25"

{
  "orderNumber": "D26EDAB5",
  "internalOrderId": "d26edab5-5662-426b-b48a-ae1e39790e25",
  "status": "paid",
  "orderValue": 9.75
}
```

Lookup tip: Prefer 0C#### or UUID. If an order shows a short alphanumeric display id, use the `internalOrderId` UUID from the list response for GET/shipment/tracking path calls.

F Update AWB when shipped

Required JSON: orderNumber, courierName, awb.

```
curl -sS -X POST \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
-H "Content-Type: application/json" \
-d '{"orderNumber":"0C10003","courierName":"USPS","awb":"9400111899223344556677"}' \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/shipment"

# Path style (same body):
curl -sS -X POST \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
-H "Content-Type: application/json" \
-d '{"orderNumber":"0C10003","courierName":"USPS","awb":"9400111899223344556677"}' \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders/0C10003/shipment"
```

Live route evidence (validation – no customer order mutated for this guide):

Terminal – POST /shipment with empty body

HTTP 400

```
$ curl -sS -X POST -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" -H "Content-Type: application/json" -d '{}' "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/shipment"

{
  "error": "orderNumber is required"
}
```

Terminal – POST path shipment missing awb

HTTP 400

```
$ curl -sS -X POST -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" -H "Content-Type: application/json" -d '{"orderNumber":"0C10003","courierName":"USPS"}' "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders/0C10003/shipment"

{
  "error": "Required"
}
```

Terminal – POST /shipment unknown orderNumber

HTTP 404

```
$ curl -sS -X POST -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" -H "Content-Type: application/json" -d '{"orderNumber":"0C99999","courierName":"USPS","awb":"9400..."}' "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/shipment"

{
  "error": "Order not found"
}
```

Example success response (returned when a real order is updated):

Example success – shipment update

HTTP 200

```
$ curl -sS -X POST -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" -H "Content-Type: application/json" -d '{"orderNumber":"0C10003","courierName":"USPS","awb":"9400111899223344556677"}' "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/shipment"

{
  "orderId": "0C10003",
  "orderNumber": "0C10003",
  "internalOrderId": "7d4e5e74-e89a-477a-bd12-dab8ce979cd2",
  "status": "shipped",
  "awb": "9400111899223344556677",
  "courierName": "USPS",
  "updatedAt": "2026-08-01T12:00:00.000Z"
}
```

Effect: saves trackingNumber=awb, carrier=courierName; moves to shipped when allowed; notifies customer.

G Update tracking / shipment status

Required JSON: `orderNumber`, `currentShipmentStatus` (alias: `currentStatus`). Optional: `note`.

```
curl -sS -X POST \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
-H "Content-Type: application/json" \
-d '{"orderNumber":"0C10003","currentShipmentStatus":"in_transit"}' \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/tracking"

# Path style (same body):
curl -sS -X POST \
-H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" \
-H "Content-Type: application/json" \
-d '{"orderNumber":"0C10003","currentShipmentStatus":"in_transit"}' \
"https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders/0C10003/tracking"
```

Accepted statuses (case-insensitive): `processing`, `packed`, `shipped`, `in_transit`, `dispatched`, `out_for_delivery`, `delivered`, `complete`.

Terminal – POST /tracking empty body

HTTP 400

```
$ curl -sS -X POST -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" -H "Content-Type: application/json" -d '{}' "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/tracking"

{
  "error": "orderNumber is required"
}
```

Terminal – POST path tracking missing status

HTTP 400

```
$ curl -sS -X POST -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" -H "Content-Type: application/json" -d '{"orderNumber":"0C10003"}' "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/orders/0C10003/tracking"

{
  "error": "currentShipmentStatus (or currentStatus) is required"
}
```

Terminal – POST /tracking unknown order

HTTP 404

```
$ curl -sS -X POST -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" -H "Content-Type: application/json" -d '{"orderNumber":"0C99999","currentShipmentStatus":"in_transit"}' "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/tracking"

{
  "error": "Order not found"
}
```

Example success – tracking update

HTTP 200

```
$ curl -sS -X POST -H "X-Vendor-API-Key: 4bf361b07a50b6346046b8b446fbbe6f5151c404bad6e46431c94bd1172d2673" -H "Content-Type: application/json" -d '{"orderNumber":"0C10003","currentShipmentStatus":"in_transit"}' "https://xp9lzxeg40.execute-api.us-east-1.amazonaws.com/prod/vendors/orange-county/tracking"

{
  "orderId": "0C10003",
  "orderNumber": "0C10003",
  "internalOrderId": "7d4e5e74-e89a-477a-bd12-dab8ce979cd2",
  "status": "shipped",
  "currentShipmentStatus": "in_transit",
  "currentStatusReceived": "in_transit",
  "statusMapped": "shipped",
  "updatedAt": "2026-08-01T12:05:00.000Z"
}
```

5. List query parameters

days	Default 15 (max 90) – createdAt window
limit	Default 50 , max 200
cursor	Opaque nextCursor from previous page
since	ISO createdAt lower bound override
updatedSince	Incremental sync on updatedAt
status	Exact status filter (e.g. paid, shipped)

Without status, unpaid / cancelled / refunded are hidden.

6. Response field reference

Order

- orderId / orderNumber
- internalOrderId (UUID)
- orderDate, status
- senderName, giftMessage
- Recipient name / address / phone
- orderValue (vendor cost total, USD)
- deliveryDate, trackingNumber, carrier

Item

- sku / productCode
- productName, quantity
- price (vendor unit cost)
- productImageUrl
- weight + weightUnit (oz)

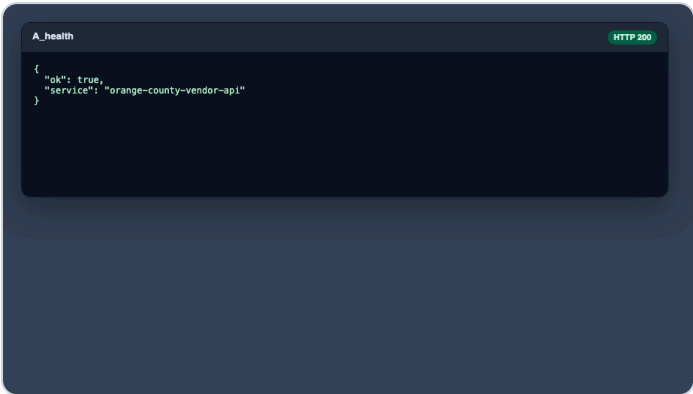

7. HTTP status codes

200	Success
400	Validation error (missing/invalid fields)
401	Missing/wrong API key
403 / 404	Order not found for this vendor
500	Temporary server error – retry

8. Vendor go-live checklist

- [] Stored Base URL + API key securely
- [] Health returns orange-county-vendor-api
- [] List orders returns Orange County items only
- [] Pagination loop implemented (hasMore / nextCursor)
- [] Products matched by SKU
- [] AWB posted on ship (orderNumber, courierName, awb)
- [] Tracking posted on status change
- [] Duplicate prevention + optional updatedSince
